

COLLOQUIUM

Roger Key
California State University, Fresno

New Resources for In-Person Teaching* (*and remote teaching too!)

Abstract

While we were out isolating from COVID-19, the Physics Department demonstrations and lab equipment have been updated. This presentation should help our instructors learn some of what is new in our collection. This includes some new demonstrations and lab abilities as well as some new tools to assist presenting our usual demonstrations.

No zoom option will be available for this colloquium.

3:00-4:30 p.m., Friday, February 11th in McLane 162
