

Physics Colloquium

Dr. Roberto Andresen Eguiluz, UC Merced

Unlocking Opportunities: Summer Bio-Research Internships at UC Merced

ABSTRACT

During this talk, I will introduce the Center for Cellular and Biomolecular Machines (CCBM) from the University of California Merced, a National Science Foundation (NSF) Centers of Research Excellence in Science and Technology (CREST). I will provide examples of research activities and present two Research Experiences for Undergraduates (REU) opportunities. Last, but not least, I will discuss strategies to apply for the opportunities and a brief overview of my own research interests: experimental determination of intermolecular forces of bioinspired molecules and interfaces.

3:00-4:00 p.m., Friday, February 7th, 2025

In-person in McLane Hall 162
